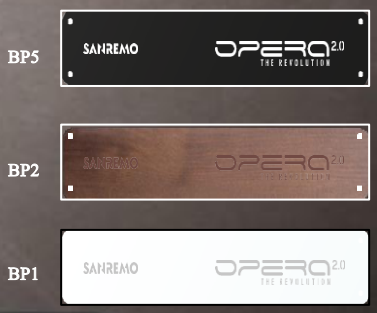
MULTI BOILER SYSTEM

MULTIBOILER SYSTEM

High accuracy thermal stability thanks to the Sanremo multiboiler system with sophisticated electronic boards that continuously control temperature throughout all phases of extraction

Steam and coffee circuits work totally independent to maximize performance in every working condition under high workload.



Everything in an App

It is possible to save and recall new configurations set by the user or the default ones, specifically designed to allow even the less experienced bartenders to obtain immediately excellent results in the cup.

Clicking in “save new configuration” you can save your perfect espresso dispensing menu and transfer it into another machine

Opera wi-fi

With the interface “Express yourself”, the barista has total control of the extraction phase of his coffee and can manage each dispensing parameter according to his experience and professionalism. To configure and set all the parameters of the machine, a specific App has been designed, which runs on tablet. The application “Express yourself“ utilizes a graphic interface, it is both user friendly and intuitive. This interface allows the user to set each groups relative parameters accurately for the perfect extraction. Upon choosing the group (step A) and assigned a configured profile (step B,C) will define the general parameters of extraction: temperature and doses (step D,E). At the end it is possible to adjust the parameters relative of the 3 extraction’s phases: pre-infusion, main infusion, post-infusion (step F).

Officine Fratelli Bambi

Officine Fratelli Bambi is La Marzocco's custom espresso machine workshop. Each piece here is crafted by hand and pays tribute to the original metalworking shop owned by the Bambi brothers in Florence.

la marzocco

handmade

FINISHING TOUCHES: espresso elevated to art Officine Fratelli Bambi offers custom espresso machines based on existing historical designs and can also work one on one for a bespoke experience.

finding the right fit

La Marzocco espresso machines are known for consistency, reliability, and precision, making them a great fit for any business. However, each machine in our lineup has its own set of strengths. These considerations will help you prioritize your options and choose a machine that drives your business forward.

Glossary Of Terms

All La Marzocco machines are equipped with distinctive technologies that are appreciated by baristas all over the world. These technologies are core to what makes La Marzocco machines perform the way they do

Brew Boiler & Steam Boiler

La Marzocco espresso machine has a dedicated brew boiler where water is heated for brewing espresso and a steam boiler, where water is heated beyond boiling to produce steam for heating and texturing milk. Some models have independent boilers for each group head for even more temperature precision.

Saturated Group Heads

The group head is the part of the espresso machine that delivers hot water over the coffee La Marzocco machines feature a saturated group head, where water from the boiler circulates through the metal for better temperature precision.

A PID Controller

uses an algorithm to regulate the temperature in the brew boiler. By predicting the rise and fall of water temperature as it sits the PID proactively heats the brewing water to ensure precise temperatures with set points of 0.1° Fahrenheit.

RAKPRO

la marzocco

workflow planning

After identifying your goals, it's helpful to plan out your complete equipment workflow, which includes your machine, grinder, and accessories. By optimizing your equipment set and tool placement, you can provide a fast and friendly customer experience that allows your staff to execute high quality espresso efficiently.

grinder speed

Using a grinder with a faster grind speed and consistent dosing will increase the number of shots a barista can pull in a given time period.

THE ULTIMATE WORKFLOW

wally

Hands-free milk steaming can assist with busy cafés or smaller coffee bars with limited space behind the counter.

auto-volumetrics and scales

By using a machine that offers automated shot output either by volume or weight, the barista is free to focus on other tasks, while maintaining consistency in the cup.

straight-in portafilter and steam flush

KB90 introduces two new workflow considerations, the Straight-In Portafilter which reduces wrist strain for baristas, and Steam Flush which automatically flushes the group after each shot.

la marzocco

linea classic s dual PID controller

A specialty coffee icon, the workhorse of a high-volume café

model: Linea classic s

no. groups: 1 | 2 | 3 | 4

configurations: EE | AV

The La Marzocco Linea Classic is the machine that has helped to forge the world of coffee over the past three decades. The clean lines and familiar charm of the Linea Classic occupy many of the cafés, roasteries, and chains whose names have defined the industry.

The Linea Classic S is a reliable, consistent workhorse that can be trusted to be a dependable partner in any coffee program.

A tried-and-true machine, the Linea Classic S is perfect for your new café, bar, or restaurant.

LINEA CLASSIC S HIGHLIGHT: dual PID controller

A PID controller employs an algorithm to regulate when and for how long the heating element is engaged in the boiler. Using a PID controller dramatically reduces temperature variability by precisely regulating the energy of the heating elements. With dual PID, both boilers use this system, ensuring a consistent brew temperature and stable steam pressure. The barista can adjust both boiler temperatures to a precise numerical value using the group keypad.

LINEA PB OVERVIEW

The Linea PB represents the first full update to the Linea Classic since it was released in 1989. The Linea PB features the iconic La Marzocco stainless steel body, updated with refined and sharpened design elements and a lower profile.

To complement its stylistic updates, the Linea PB features improved component longevity and new electronics that give the barista control over functions directly from the machine interface – including boiler temperatures, brewing volume, hot water tap dose, and auto-backflush.

LINEA PB HIGHLIGHT: la marzocco user interface

Proprietary electronics drive intuitive programming and provides heads-up information and systems monitoring on a digital display:

- Shot timers • Flow pulse counter • USB firmware updates
- Boiler temperatures • System alerts • ECO mode

STRADA S OVERVIEW

Over the course of two years La Marzocco worked with 30 of the world's finest coffee professionals to design a machine. This group was known as the Street Team. The Strada, Italian for "street," was named in their honor. A lower profile invites customer engagement in a café setting, while also providing the barista an open, expansive work area. The Strada platform has been designed to encourage creativity and customization so that each machine can be unique.

GB5 S HIGHLIGHT: classic italian design

The gracious lines and harmonious curves of the GB5 S speak to the La Marzocco heritage of design and intention. The understated side shields, elegant Florentine lilies, and subtle insignia of il marzocco on the cup rail combine to give this machine the feel of an heirloom built to stand the test of time.

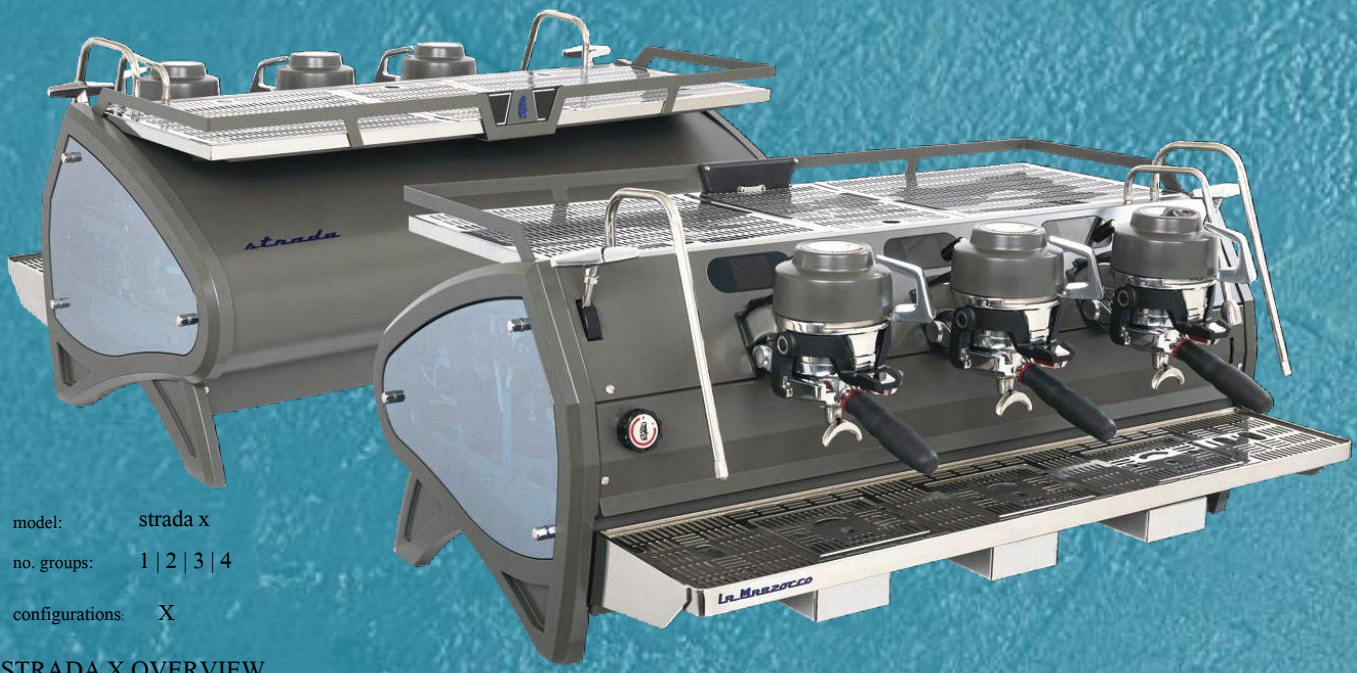
Strada x

a machine developed by baristas for baristas



model: strada x

no. groups: 1 | 2 | 3 | 4

configurations: X

STRADA X OVERVIEW

The Strada X is the culmination of La Marzocco's innovative espresso technology. Blending workflow efficiency with groundbreaking pressure profiling, the Strada X gives baristas total control over the shots they pull while maintaining unprecedented repeatability.

Named for the "Street Team" of baristas, Techni- cians, and coffee professionals who helped design the original Strada, the Strada X continues La Marzocco's legacy of coffee-forward, cutting-edge espresso innovation.

STRADA X HIGHLIGHT: three distinct brewing modes

Manual Brewing allows the barista to manually create a pressure profile by moving the paddle between 0 and 12 bars of pressure.

Profile Brewing lets the barista select an existing profile to run automatically when the paddle is engaged.

AV Brewing allows the barista to set a target weight and run espresso with consistent pressure.

SPECIFICATIONS	1 group	2 group	3 group
dimensions (W x D x H)	21" x 27.2" x 19.7"	32.7" x 27.2" x 19.7"	103.6" x 27.2" x 19.7"

leva

reimagining what a lever-actuated espresso machine can be

models: leva

no. groups: 1(x) | 2 | 3

configuration: X | S

LEVA OVERVIEW

Featuring eye-catching design and a lower profile to invite customer interaction, Leva re-invents the iconic lever machine design with more ergonomic elements. Leva is a cutting-edge café centerpiece that encourages engagement, barista experimentation, and coffee conversations, while delivering a delicious coffee extraction. Leva brings with it design, focusing not just on physical beauty, but also on the satisfaction found in a truly mechanical system.

LEVA HIGHLIGHT: live pressure visualization (leva x only)

The Leva is equipped with dedicated graphical displays for each group. The displays provide live visualization of pre-infusion pressure, extraction pressure, and time throughout the course of the shot. After the coffee has been delivered, the extraction curve and parameters are visualized on the displays as a graph. The barista has the ability to overlay past visualizations, saving up to four graphs for each group as guides for future extractions.

SPECIFICATIONS

kb90

the ultimate workflow machine featuring the straight-in portafilter

model: kb90

no. groups: 2 | 3

configurations: AV | ABR

KB90 OVERVIEW

The KB90 is the ultimate evolution of the Linea PB form, designed to optimize workflow for baristas by improving the ergonomics and features of the machine. The Straight-In Portafilter removes strain on baristas that causes repetitive stress injuries.

Efficiency is also increased thanks to Steam Flush: after each extraction, a burst of steam purges the brew path and is followed by a flush of hot water, keeping the group heads clean even during the busiest hours.

KB90 HIGHLIGHT: straight-in portafilter

Designed to simplify the motions required to engage the portafilter and reduce the strain by 12x on the barista for even greater performance and everyday usability. High-volume coffee environments demand that a barista can work quickly and efficiently to produce drinks during the busiest periods of the day. The Straight-In Portafilter can noticeably mitigate repetitive stress injuries through its ease of action improving the natural workflow and output of the barista.

Mod Bar

redesigned for reliability

model: mod bar espresso no. groups:1 or 2 per module configurations: AV | ABR

espresso system

Transform your space with Modbar AV, seamlessly integrating into your design while delivering absolute consistency and the trusted reliability of La Marzocco components.

FEATURES

- Linea pb volumetrics and optional scales
- multi-position lever with four saved programs
- add-a-tap system for two taps per module
- easy access to water, power, and drain connections
- PID temperature control
- heated brew group

steam system

Modbar Steam features a sleek, minimal design that delivers powerful steam performance in a compact footprint, blending seamlessly into any space.

FEATURES

- double-walled performance touch steam wand
- omnidirectional ball fitting
- minimal purge required with no steam valve rebuilds
- add-a-tap system for two taps per module
- simple on / off switch controlled by solenoid inside module
- right-hand side connections for easy service access

pour-over system

Effortlessly brew using programable recipes, accessible at the touch of the tap's two buttons—all within an aesthetic that showcases the craft of brewing coffee.

FEATURES

- store pour-over profiles in the module
- automatic and manual brewing modes
- built-in flow control valve
- volumetric and time-based dosing
- holder ring and two spray tips included
- unique "teaching" mode; perform your brew-by-hand and the system memorizes and stores it for you

M200

RAKPRO

LA CIMBALI

SUSTAINABILITY

The M200 is the result of a multi-year research project. A process of collective genesis involving the contribution of engineers and production technicians, baristas and sensory scientist- brand managers and industrial designers, resulting in an unprecedented machine. A long-time interpreter of the La Cimbali spirit, designer Valerio Cometic has harmonized the different contributions in an iconic form, a fluid expression of the forces at work and the gestures in action. The new M200 is a three dimensional representation of a renewed relationship between increasingly attentive baristas and their customers, who are increasingly eager to discover and appreciate high-quality coffee.

M200

A machine designed to take the sensory experience to its fullest expression From our origins towards the future, aiming for perfection. The beating heart of the M200. Three different systems for a ‘tailored’ sensory result. The innovative thermal system with independent boilers is where advanced technology meets the barista’s expertise. GT1 allows you to control the temperature of each boiler, guaranteeing the stability and flexibility needed for various recipes, ranging from espresso to café crème or French-style coffee. PROFILE adds differentiated modulation of the pressure profile to the temperature control, refining the in-cup result in terms of body, acid and bitterness intensity, and olfactory spectrum. To meet the needs of advanced coffee bars with a wide range of specialties. GT2, available soon, will allow up to 2 temperature profiles to be set for each coffee group, further expanding the machine’s potential use.

LA CIMBALI

RAKPRO LA CIMBALI M26TE

Ergonomics

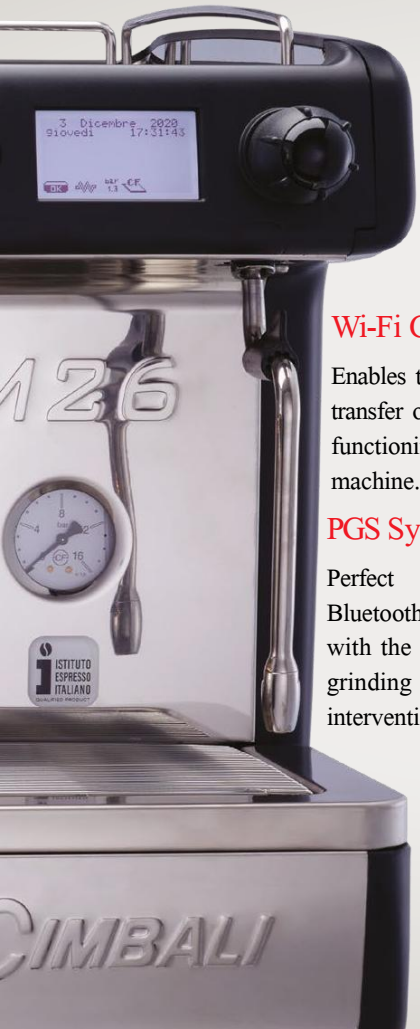
Quality coffee. Always.

The M26 TE has a refined and functional design, which allows quick and easy use of the machine, thanks to the service display and worktop lights.

Ergonomic and versatile, it is equipped with a backlit electromechanical push-button panel, inclined filter holders and long steam wands.

Smart Boiler

This patented innovation allows you to manage the energy stored in the boiler to guarantee a constant supply of steam and water even when the machine is used intensively. Thanks to this technology, no barista will ever find themselves caught short without enough steam to prepare drinks that have been ordered.



Features and design

- Casing covering metal groups in glossy chromed zamak
- Visible chromed coffee groups
- Aesthetic metal feet
- Available in two colors, white and black
- Optional wooden friezes

Wi-Fi Connection

Enables to a Wi-Fi network, permitting the transfer of information and statistics on the functioning and consumption of the machine.

PGS System

Perfect Grinding System (PGS) and Bluetooth Technology the M26 TE interacts with the grinder-doser to guarantee perfect grinding and quality coffee, without the intervention of the barista.

Turbo Steam Milk4

The TurboSteam Milk4 steam wand delivers steam and air to heat or froth milk, even in small quantities. Allows you to automatically prepare 4 different milk recipes.

RAKPRO LA CIMBALI

M26 TE

M26 TE Compact

Quality coffee in small spaces

The compact model enriches the M26 TE range, combining quality in the cup with adaptability in restricted spaces. The M26 TE Compact is available in the version with 1 or 2 groups, in white or black.

Turbo Steam with 2 settings, for heating or frothing large quantities of milk without manual intervention.

Thermo drive, the LaCimbali adjustable thermal balancing system. It allows you to adjust the water

temperature and adapt each group to different blends. Mixed service water.

THE FUTURE IS NOW

The future is now. It is founded on respect. It has inspired a vision, one where all the values of the LaCimbali brand come to life: people, research, technology, innovation, an unwavering drive for perfection, while simultaneously focusing on sustainability.
Welcome to a better future, for all of us.
Welcome to the world of M40.

M40

THE FUTURE IS DESIGN

With the signature of Valerio Cometti + V12 D esign, the new M40 aligns itself closely with t he style of the M200, introducing a family feeling that was missing. The style recalls our f lagship product but adapts its forms to better meet the needs of different customers. A red thread that continues to guide us, through time and space.Premium Materials. The metal body i s designed with highly resistant, high-quality, a nd durable materials, including die-cast alumin um and
steel.

LA CIMBALI

RAKPRO LA CIMBALI

M40

THE FUTURE

THE FUTURE IS ERGONOMY

WE ARE CENTERED

Coffee groups are positioned away from the steam wands to ensure greater interaction and placed in the center of the machine to optimize the operations

WE KEEP PACE

New 220mm group spacing everything is within the barista's viewtominimize efforts reduce errors.

REDUCED DIMENSIONS

The machine has been designed to be more compact: in width to optimize space in height to ensure better interaction between the barista and customers. All of this comes with a reduction in weight, approximately 30% less than the previous model.

ESPRESSO PLATFORM*

Ergonomics at their highest level. An espresso plat form has been designed to make the most of work space and enables the barista to quickly efficiently create different recipes Stable yet easily removabe Two machine concepts in one product.

SAFETY & CLEANLINESS

Prevents user contact with hot parts and facilitates milk residue removal.

*The "Tall Cups" version with foldable cup trays is still available.

INCLINED MANUAL STEAM WANDS COLD TOUCH

A blend of ergonomics and safety, the steam wands are designed to facilitate the barista's workflow during peak hours, preventing burns thanks to Cold Touch technology. Additionally, the steam knob is wide and sturdy, made of soft-touch material and inclined towards the barista to make every maneuver safer and more efficient.

TURBOSTEAM MILK4 COLD TOUCH

TOTAL AUTOMATION

Reliable LaCimbali technology for heating and automatic milk frothing.

PRECISE RESULT IN THE CUP

Ensures high and consistent quality of hot or cold milk foam, with perfect texture at any time of the day.

RECIPE CUSTOMIZATION

Up to 4 automatic milk frothing recipes with or without foam. Temperature and froth level can be preset for each recipe.

THE FUTURE IS DIGITAL

SOLUTIONS AT YOUR FINGERTIPS

A completely redesigned and innovative interface. A tempered glass panel and a highly technological full-touch capacitive keypad that offers flexibility, speed, and ease of use, all to enhance the user experience.

The width and inclination of the panel improve the ergonomics and workflow of the operator. The graphics and icons align with those of the M200, confirming LaCimbali's distinctive 'house style.'

MAXIMUM PERSONALIZATION

Interaction is simple and fast thanks to the fully customizable interface, both in the variety and quantity of programmable recipes and in the display/icons.

MAINTENANCE SPEED

The absence of the carter group in favor of a single removable block speeds up both regular and extraordinary group maintenance.

All basic adjustments, essential for achieving the best cup results can be made without the need for technical intervention

THE FUTURE IS TECHNOLOGY

A BRAND NEW THERMAL SYSTEM

Not different temperatures for each coffee group, but an innovative and sustainable centralized heating that ensures:

- high repeatability of dispensing temperature;
- the possibility to dispense at lower temperatures without affecting the effectiveness of other services - steam and hot water.
- immediate selection of temperature, on the display, based on the chosen blend/single origin.

The revolution comes from within, from the highly energy-efficient LaCimbali thermal system. An alternative to LaCimbali's 'historic' heat exchanger system.

Minimize thermal losses: thanks to the compact size of both the coffee boiler (1.1L) and the s ervice boiler (3.9L), as well as their effective insulation.

Hot water only where and when needed coffee boiler and service boiler are separate A single coffee boiler connects to coffee groups always maintained at the correct service temperature. This way, energy and water consumption are reduced, while the flexibility of using the various groups is increased, keeping dispensing constant.

THE FUTURE IS AWARENESS

Sustainability and consumption reduction have become essential necessities: M40 is the solution for all those who want to make conscious choice for themselves and forthe planet

THE FUTURE IS EFFECTIVENESS

REPLACEMENT SPEED ("SERVICEABILITY" -30%*)

M40 is designed to ensure significant time savings for both regular and extraordinary maintenance, resulting in a better Total Cost of Ownership (TCO).

*: compared to M39 DOSATRON, based on internal testing standards

UP TO -50% **IGNITION TIME**

only 6 minutes
*compared to M39 SATRON, based on internal tes ting standards

UP TO -55% **FIRST HEATING CONSUMPTION**

*compared to M39 DOSATRON, based on internal t esting standards, washing cycles included

UP TO -55% **"READY-TO-USE" MODE CONSUMPTION**

*compared to M39 DOSATRON, based on internal t esting standards. According to 1-hour use cycle

UP TO -55% **IMPACT**

result of the reduction in "Product Usage" energy consu mption (kg CO2-Eq.), without considering the contributio ns of production and disposal of the product.

THE FUTURE IS ideal

M40 is the ideal solution for:

QSRs & COFFEE CHAINS

Large chains, characterized by a high number of installed machines and users, require ease of use, result repeatability, consistent performance, energy savings, and sustainability.

FOOD & BEVERAGE RETAIL

Establishments and consumption points with international clientele, where coffee is a multifaceted experience with various interpretations and a particular focus on sustainable quality

RAKPRO LA CIMBALI **M40**

THE FUTURE

THE FUTURE IS CONNECTION

PERFECT GRINDING SYSTEM (PGS)

Technology that automatically makes any necessary grinding and dosing corrections to en sure precise and consistent dispensing without any direct intervention from the barista.

BARISTA DRIVE SYSTEM (BDS)

The machine communicates automatically with the grinder-doser, recognizing the portafilter and identifying only one correct recipe at a time, thus preventing errors.

G50: BREWING PARTNER

The G50 grinder-doser is the ideal solution for working with the M40.

IOT – Art.In.Coffee® BIDIRECTIONAL TELEMETRY

The machine can be connected via IOT to LaCimbali's Art.In.Coffee data control platform. This enable s data analysis, machine fleet management, and monitoring of performance and consumption data.

APP – LaCimbali Project

Setting and customizing parameters and various recipes will be possible through a smartphone ap plication. Simple and intuitive, it's the digital solution that allows for easy pairing and machine set up from a single display: from water temperature to boiler pressure to on/off schedules.

Grinders and Accessories

grinder considerations

After you have chosen your espresso machine, your next big decision is the grinder. Here we'll discuss three of the key points of difference among grinders to help you make your selection. Burr shape

Burr Shape:

Commercial espresso grinders use either conical or flat burrs that grind coffee beans into small particles. In general, conical burrs grind coffee faster than flat burrs. Conical or flat burrs can also create different taste profiles. It is best to try your coffee with both and choose the one that gives you the preferred mix of taste profile and speed.

motor placement

Motor Placement: The motor that spins the burrs might be located either directly below the burrs (direct drive) or in the back of the grinder, connected to the burrs by a belt (belt-drive). Motor placement affects heat transmission during the grinding process.

dosing method

electronic

Electronic grinders dose freshly ground coffee directly into the portafilter either on-demand or based on a programmed grind time.

grind-by-weight/grind-by-sync

Grind-by-weight and grind-by-sync grinders use a load cell in the portafilter cradle to weigh the coffee while it is grinding. These grinders allow the user to program a desired coffee weight by 0.1-gram increments and dose directly into the portafilter.

grind-by-revolution

The La Marzocco Swan uses a variable-RPM motor and a specialized motor controller to program coffee dosing based on the number of times the burrs spin, creating more accurate and repeatable dosing.

FLAT BURR

direct drive

Smaller footprint, but bigger temperature variability.

CONICAL BURR

belt drive

Larger footprint, smaller temperature variability.

RAKPRO

la marzocco

Swan

innovative grinding technology housed in elegant design

FEATURES

constant motor speed

With an advanced motor control and monitoring system, the Swan ensures a constant burr speed regardless of resistance from the coffee

stable low heat grinding

An offset belt drive motor, low RPM grinding, and efficient burr design drastically reduces heat buildup

buttonless portafilter detection

The Swan uses the conductivity of the portafilter as the sensor to activate grinding. This system is free of moving parts, ensuring reliability

dose by revolution

The advanced motor monitoring system also allows the user to program each dose based on the number of revolutions made by the burrs. This ensures more accuracy and consistency than timer-based grinders

burrs:	83mm, conical
hopper capacity:	3.75lbs
grind speed*:	4.5 sec

*approx. time per 18g dose on med. speed

SWAN HIGHLIGHT

patented anti-static technology

The Swan's patented anti-static technology uses an electric field to neutralize the static charge generated by grinding. This allows for coffee to fall directly from the burrs into the portafilter without any clumping or stray grounds creating messy countertops, while minimizing retention and waste when changing the grind size.

The Swan combines new grinding technology with nearly 100 years of experience in espresso machine innovation, allowing La Marzocco to reimagine the coffee grinder. At its core, the Swan grinder features patented anti-static technology that removes any static charge from the coffee as it leaves the burrs. This allows for the ground coffee to fall directly and neatly from the burrs into the portafilter without sticking to any surfaces, fundamentally rethinking the way a coffee grinder works.

WALLY MILK

improve café workflow and efficiency with automated milk steaming

FEATURES

pro touch steam wand

Vacuum-insulated double-walled steam wand that prevents burns and keeps milk from sticking to the wand

digital display

An intuitive display that allows for simple programming and easy adjustments to machine parameters

tilting platform

An oscillating tray that simulates the skilled movement of a barista, creating a consistent vortex while steaming

easy access for technicians

Engineered with technicians in mind, provides easy service access and minimal downtime

20 programmable recipes

Customizable specifications for milk temperature, level of aeration, and alternative milk settings

WALLY MILK HIGHLIGHTS

Wally Milk is an automatic milk steamer that is designed to simplify the milk steaming process, providing consistent, high quality steamed milk at the touch of a button. Wally Milk focuses on improving bar flow with improved ergonomics, enabling the barista to focus on a more intimate customer experience. Wally Milk can be programmed with up to 20 recipes with specifications for milk temperature and level of aeration, allowing baristas to easily shift between dairy and milk Wally Milk is compatible with any commercial La Marzocco or Mod bar machine, as well as other popular commercial espresso machines. Wally Milk comes with three milk pitchers (8oz, 14oz, and 24oz) and, thanks to its infrared sensors, automatically recognizes which pitcher is being used. It is also possible to use any matte finish pitcher between 8oz and 24oz. Wally Milk monitors the milk level and temperature with two sensors, which allow the machine to steam to the correct recipe. The proximity sensor measures the pitcher size and the level of milk. The infrared sensor at the base of the drip tray monitors the steaming temperature to ensure consistency and texture. alternatives and different types of beverages.

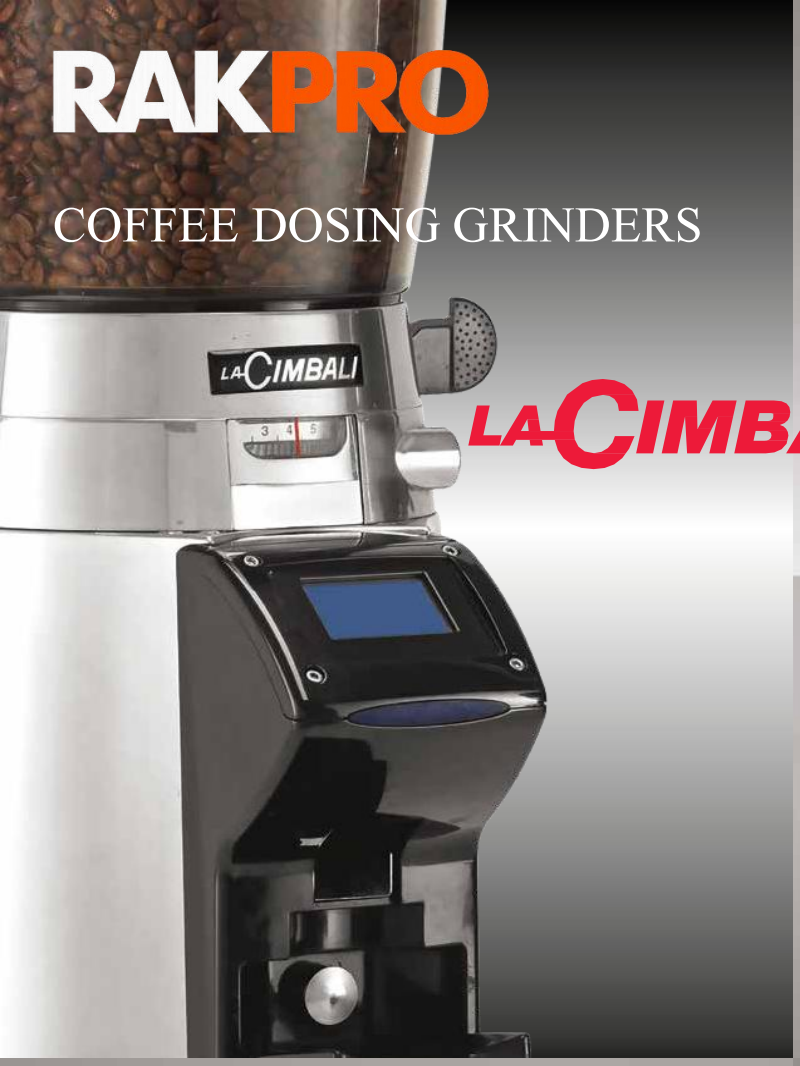
COFFEE DOSING GRINDERS



LA CIMBALI

CONIK

CONIK

CONIK WIRELESS

The Conik Wireless interacts automatically via Bluetooth with the coffee machine (when the latter is equipped with a special electronic board): the machine sends a signal to the grinder so that it adapts granulometry and dose according to the data received in order to obtain the best in-the-cup result.

- Touch screen.
- Filter-holder fork of aluminum.
- High production per hour.

MAGNUM

MAGNUM ON DEMAND

MAGNUM ON DEMAND

With Magnum on demand, the whole coffee beans are ground directly in the filter holder before the espresso is extracted resulting in better in-the-cup aroma. The grinder-doser can be programmed to operate automatically or manually. In automatic mode, the grind function is activated by a photocell when the filter holder is placed on the fork. Dosage is pre-selected using the touch screen. In manual mode, once the filter holder is placed on the fork, the grind function is activated by selecting the required dose on the touch screen. In its Wireless version, the Magnum On Demand interacts automatically via Bluetooth with the coffee machine (when the latter is equipped with a special electronic board): the machine sends a signal to the grinder so that it adapts granulometry and dose according to the data received in order to obtain the best in-the-cup result.

- The grammage of single and double doses is independent and consistent Micrometric screw adjustment of grind setting: fast and accurate
- Height-adjustable fork suitable for various filter holders
- Dosage centred in the filter holder
- No electrostatic charge
- Cleaning is quicker and simpler
- Touch screen for an easy and intuitive programming and use
- Three settings: single dose, double dose or continuous grind

G50

PERFECTION IN MACHINE

PERFECTION IN THE GRINDER

PURE ESSENCE

The brewing speed ensures perfect temperature control and minimal retention of the coffee in the grinding chamber, with benefits for the raw material, its freshness and purity.

Each grind is thermo-controlled to ensure maximum stability and to preserve the coffee's sensory profile.

STRAIGHT TO THE POINT

Ground coffee falls precisely into the filter holder. There is not a single stray grain under the light that comes on during dispensing to illuminate the working area.

CONNECTIVE INTELLIGENCE

Set preferences each time, or once and for all. It just takes a few simple taps to set grind size & time on the intuitive touch display the position and color of each icon can be customized to keep everything under control.

G50 THE NEW ERA OF GRINDER-DOSERS

LA CIMBALI

SIMPLE AND INTUITIVE

G50 dialogues with the machine and with you. Always connected, always at your disposal.

Versatile. Fast. Precise.
The G50 is LaCimbali's latest-generation grinder-doser that revolutionises

DESIGN

- The G50 was created to simplify the user experience. A completely innovative design with elegant contours and a new interface: 3.5 TFT capacitive touch display, easy to use and fully customisable.
- The intuitive adjustment system and stabiliser ensure consistent performance over time, even after intensive use during peak hours.
- The premium version is equipped with a Bluetooth system and PGS technology to guarantee perfect grinding quality for espresso.
- An exercise in style and embodiment of functionality.
- Minimalist balance of shapes and contours.
- Perfect in any setting.

PERFECT FROM ALL SIDES

Every detail contributes to enhancing the quality of the coffee and ensuring intuitive, high-performance usability.

FREEDOM OF MOVEMENT

The G50 follows your hand accompanies your eye supports your movements and perfects your technique. Assisted by improved ergonomics the barista's workflow is guided with no margin for error.

RAKPRO LACIMBALI

G50 THE NEW ERA OF GRINDER-DOSERS

PERFORMANCE

ALWAYS READY

Thanks to LaCimbali technology, G50 dialogues with the espresso machine. PGS – 100% of coffee monitored thanks to the dialogue between the machine and grinder-doser with grinding self-adjustment for a perfect cup every time.
Stabilizer – automatic dose-compensation algorithm, automatically adjusts the coffee dose when the grind size changes. BDS – zero coffee wastage due to recipe errors.

The coffee bean has everything needed in it. The new G50 is meticulously designed to perfection.

KEBER GRINDERS

The heart of this grinder-doser, they transform the material while preserving its properties and enhancing its taste and freshness.
• Flat grinders with a titanium nitride coating
• Durability about 4 times higher than standard grinders.

MECHANICS AND TECHNOLOGY

Flawless workmanship achieved through perfect construction, solid materials and precise design.
Improved grinding chamber with simplified access.

RAW MATERIAL, FIRST

It preserves the sensory characteristics of the coffee, from the bean to the grind in the filter.
The grind enhances each type of coffee preserving the sensory characteristics found in every cup.

DESIGNED FOR EXCELLENCE

The G50 is the ideal coffee grinder-doser for those who strive for in-cup excellence. Because the coffee can only be extracted at its best if it is perfectly ground.

Performance

ON DEMAND LINE

Features

- Steel grinding burrs Ø 64 mm
- Motor 230V - 50/60Hz - 310W - 1400 rpm
- Hopper 1,2 kg coffee beans
- Size 37x21x59h cm
- Weight 12 kg
- Wide LCD display - doses counter
- Independently adjustable single and
- double doses.
- Manual grinding
- Silent grinding
- Hand free portafilter clip
- Color: black-gray-red-white

On request

- Continuous Micrometric Adjustment
- Hopper 250 g - Hopper 500 g
- Chromed - brushed steel
- metallic silver color

MITO UP M64 Display

Wide LCD display - doses counter

- Available in the Performance version with 64 and 75 diameter
- Available with user friendly graphic LCD display.
- High Production grinders and cooling fan.
- Height-adjustable portafilter fork to precisely regulate the flow of the coffee which offers wide compatibility with the different filter holders on the market.
- Recommended for high consumption. The standard version is recommended for medium consumption.
- User friendly
- 2.8” full touch display.
- Simplified grinding adjustment thanks to the easy setting system: unique and progressive notches that allow precise setting.
- Silent and fast grinding.
- Adjustable filter holder clip that offers wide compatibility with filter holders on the market..

الابعاد: 50 عرض × 61 عمق × 92 ارتفاع cm

مواصفات آلة ايس كريم توب كولد

1- الجهد الكهربائي فولت : 220 القدرة واط : 2000
2- بلد المنشأ : الصين
3- نظام التبريد : الهواء.
4- مؤشر لتنبيه المُشغّل لإضافة الخليط انخفاض الكمية
5- جسم متين من الفولاذ المقاوم للصدأ
6- وعاءان بسعة 10 لتر لكل وعاء
7- اسطوانتين تجميد بسعة 1.9 لتر لكل منهما
8- تنتج 30 لتر/ الساعة (280 - 300 كوب)
9- مزودة بوحدة تحكم بمعالج دقيق

E30 50 عرض × 73 عمق × 84 ارتفاع cm
C30 54 عرض × 73 عمق × 140 ارتفاع cm

مواصفات آلة ايس كريم توب كولد

1- آلة الآيس كريم عالية السعة.
2- التيار الكهرباء فولت 220 - القوة 2200 واط
3- تدعم نكهتين مختلفتين و واحدة خليط من النكهتين
4- سعة الوعاء 11.6 لتر (5.8 لتر * 2)
5- تنتج كل ساعة 20-25 لترًا أو ما يقرب من 280 كوبًا.
6- نظام تسليم المزيج القائم على الجاذبية.
7- نظام تبريد بالهواء.
8- يستخدم المبرد R22 / R404.
9- الضاغط من ماركة TECUMSEH و بقوة 1.25 حصان

T25 66 عرض × 54 عمق × 79 ارتفاع cm
C25 66 عرض × 54 عمق × 120 ارتفاع cm

مكينة عصارة برتقال توب كولد

- الجهد الكهربائي (فولت) : 220
- القدرة : 1. 120 واط / 2. 100 واط
- ضمان المَصنّع (سنوات) : 2
- بلد المنشأ : الصين
- سعة التخزين: 15 كجم

ELECTRIC APPLIANCES

فرن بيتزا كهربائي HE022

- فولت: 220~240
- الطاقة: 6,4 كيلو واط
- ضمان : 2
- الصناعة : الصين
- باب: بابين 2
- الارتفاع 77 العرض 88 العمق 58

فرن كهربائي مع مروحة 8F-HEB

- الكهرباء:فولت 220 / واط 6,4
- السعة: 4 صواني
- مزود بمروحتين خلفيتين
- درجة الحرارة: 0 – 300 درجة مئوية
- الارتفاع 77 العرض 88 العمق 58
- الوزن 68 kg

عجانة كهربائية بسعة 20 لتر B20B

- الكهرباء:فولت 220 / واط 1,1
- السعة (لتر) : 20
- مزود بمروحتين خلفيتين
- سعة العجن القصوى: 6 كجم
- الارتفاع 76 العرض 40 العمق 45
- الوزن 78 kg

فرادة عجين كهربائية APD40

- الكهرباء:فولت 220 / واط 450
- قطر العجين : 40 سم
- مواد : الفولاذ المقاوم للصدأ
- الارتفاع 65 العرض 55 العمق 54
- الوزن : 45 kg

سخان بطاطس كهربائي HCW-8

- الكهرباء:فولت 220 / واط 2
- مصدر الطاقة : كهربائي
- مواد : الفولاذ المقاوم للصدأ
- الارتفاع 71 العرض 80 العمق 68
- الوزن : 30 kg

مواصفات ماكينة فشار كهربائية 68-HP

- الكهربائي فولت: 220 / واط: 1440
- مصدر الطاقة : كهربائي
- الارتفاع760/العمق420/العرض560
- الماكينة تحضير الفشار من 3 إلى 5 دقائق
- الخامة: ألومنيوم وفولاذ و زجاج مقسّى

مواصفات ماكينة غزل بنات HEC-04

- تصميم أنيق وآمن للأستخدام
- الكهرباء:220فولت 1,080 كيلو واط
- الانتاج: وحدة / 30 ثانية
- قطر الصينية :52 CM

قلاية بطاطس كهربائية مع صرف حوض 161

- مصنوعة: الاستانلس تيل المقاوم للصدأ
- السعة: الحوض 16 لتر قلاية بحوض واحد
- الكهرباء: فولت 220 / (واط) 5000
- يتحكم ترموستاتي ومصباح إشارة للتشغيل
- الأبعاد: الارتفاع360 العمق560 العرض345مم

قلاية بطاطس كهربائية حوضين 82A

- مصنوعة : الاستانلس تيل المقاوم للصدأ
- السعة : سعة الحوض الواحد 6*6 لتر.
- الكهرباء : فولت 220 / واط 5000
- عنصر تسخين : قابل للإزالة لتنظيف سهل
- الأبعاد: عرض550×ارتفاع460×العمق300مم

صاج برجر كهربائي مسطح + مسطر HEG-822

- الكهرباء:فولت 220 / واط 4400
- السطح:مصنوع الفولاذ المقاوم للصدأ
- الأبعاد: الارتفاع 240 العمق 470 العرض730 مم
- سطح الطهي : عرض70 عمق 40 سم
- درجة الحرارة: يتراوح من 50 إلى 300 درجة مئوية

سخان سندوتشات فردي GLS-811

- الكهرباء:فولت 220 / واط 1800
- السطح:مصنوع الفولاذ المقاوم للصدأ
- الأبعاد:الارتفاع العمق210 العرض400
- سطح الطهي : عرض70 عمق 40 سم
- وضع تثبيت الآلة : يُوضع على الطاولة

صانعة وافل بشكل مثلث فردي HWB-1

- الكهرباء:فولت 220 / واط 1000
- بلد المنشأ : الصين
- السطح:مصنوع الفولاذ المقاوم للصدأ
- الأبعاد:الارتفاع350 العمق350 العرض250
- درجة الحرارة: 50 - 300 درجة مئوية

صانعة وافل مبني مربعات GLS-600

- الكهرباء:فولت 220 / واط 1600
- مواد :مصنوع الفولاذ المقاوم للصدأ
- الأبعاد:الارتفاع430 العمق250 العرض370
- مربعات : 20 مربعه
- درجة الحرارة: 50 - 300 درجة مئوية

صانعة ميني بان كيك 25 قطع HNP542

- الكهرباء:فولت 220 / واط 800
- مواد :مصنوع الفولاذ المقاوم للصدأ
- الأبعاد:الارتفاع200 العمق310 العرض340
- الوقت : من دقيقه حتى دقيقتين.
- درجة الحرارة: 50 - 300 درجة مئوية

صانعة وافل 4 مربعات HX2280A

- الكهرباء:فولت 220 / واط 2000
- بلد المنشأ : الصين
- السطح:مصنوع الفولاذ المقاوم للصدأ
- الأبعاد:الارتفاع250 العمق380 العرض245
- درجة الحرارة: 50 - 300 درجة مئوية

صانعة وافل سنبلة 4 قطع HX2208

- الكهرباء:فولت 220 / واط 1750
- السطح:مصنوع الفولاذ المقاوم للصدأ
- الأبعاد:الارتفاع330 العمق365 العرض235
- درجة الحرارة: 50 - 300 درجة مئوية
- تصنع 4 قطع وافل شكل سنبلة القمح

صانعة الكريب تسخين فردي HT-220

- مادة الصنع: من الفولاذ المقاوم للصدأ
- الكهرباء : فولت 220/ واط 3000
- الأبعاد: عرض450×ارتفاع230×العمق470مم
- مطلية بطبقة مقاومة للالتصاق لسهولة التنظيف
- عنصر التسخين بشكل دائري للحرارة على سطح الطهي
- بلد المنشأ : الصين

صانعة وافل فرايز اصابع HT 2240A2

- الكهرباء:فولت 220 / واط 1000
- بلد المنشأ : الصين
- السطح:مصنوع الفولاذ المقاوم للصدأ
- الأبعاد: الارتفاع 180 العمق 350 العرض690 مم
- درجة الحرارة: يتراوح من 50 إلى 300 درجة مئوية
- مزود بمقابض عازلة للحرارة.

سخان صوصات 3 زجاجات GLS-3

- الكهرباء : فولت 220 / واط 240.
- نوع المنتج : سخان صوصات.
- الأبعاد: العرض435 الارتفاع 350 العمق 245 مم
- الخامات : مصنوعة من خامات الفولاذ.
- السعة : سخان يكفي لحمل زجاجتين
- نطاق درجة الحرارة : 40 - 90 درجة مئوية

سخان المعجنات فوق البار عرض كبير HW-60-2

- الكهرباء:فولت 220 / 1,84KW
- بلد المنشأ : الصين
- الأبعاد: الارتفاع 610 العمق 480 العرض900 مم
- ترموستات للتحكم بدرجة الحرارة
- بنظام تسخين رطب بالبخار
- انارة داخلية

Alternative Milk

What is best for latte art?

Traditionally the foam baristas create comes from the proteins in cow's milk So if you use a plant-based drink instead the results are often different Baristas certainly favor almond and oat milk But take your time to experiment If you're going to create latte art at home we recommend trying several different drinks to find the one that produces the best foam with your equipment. Whatever your reason for choosing plant-based alternatives there's a world of inspiring options to help you make your coffee your own. Want to learn more? Try these five plant-based coffee alternatives

Plant-based alternatives have become more popular in recent years but what are the best plant-based alternatives to coffee? Check out our list of top picks

RAKPRO

Alternative Milk

Almond

مشروبات اللوز أصبحت الآن مفضلة جدًا في المقاهي التي يديرها الباريستا. يقول بعض الناس إنها يمكن أن تجعل طعم القهوة يميل إلى المرارة قليلاً، لذلك من الجيد تجربة مشروبات اللوز المختلفة للعثور على النوع الذي تحبه

Almond drinks are now very popular in barista-run cafes Some people say they can make coffee taste slightly bitter so it's a good idea to try different almond drinks to find the one you like best

Coconut

جوز الهند له طعم حلو إلى حد ما لذا في بعض الأحيان يتم خلط هذه المشروبات مع بدائل خالية من الألبان أخرى بحيث تجذب أكبر عدد ممكن من الناس

that coconut has a rather sweet taste so the drinks are sometimes mixed with Dairy-free alternatives Another way to attract as many people as possible.

Oat

بديل مفضل للحليب غالبًا ما يكون لها قوام كامل يمكن أن يساعد في تحضير مشروب غني ولذيذ

A preferred alternative to milk They often have a fuller consistency that can help in preparing a rich and satisfying drink.

RAKPRO

Alternative Milk

Rice

المشروبات القائمة على الأرز لا تحتوي على الكثير من النكهة لذا لا ينبغي أن تغير طعم القهوة كثيراً ومع ذلك فهي ليست كريمية جداً لذا ربما لن تعطي القهوة النكهة الفاخرة ذات الملمس الكريمي

Rice-based drinks don't have a lot of flavor so they shouldn't change the taste of your coffee much. However they aren't very creamy so your coffee probably won't have that rich creamy texture

Soy

مشروبات الصويا يمكن أن تجعل قهوتك طعمها قليلاً حبوبي لكنها عادةً تعطي القهوة قوامًا ناعمًا وجيدًا. بعض الباريستا يقولون إن نكهة الصويا تكمل قهوة أمريكا الجنوبية لكنها قد تكون قوية جدًا بالنسبة لنكهات الفواكه في حبوب القهوة الأفريقية

Soy drinks can make your coffee taste a little grainy but they usually give the coffee a smooth, good body Some baristas say that the soy flavor complements South American coffee, but it can be too strong for the fruity flavors in African coffee beans

RAKPRO

SILICONE MOLDS/STAMPI SILICONE

CM 17,5X30

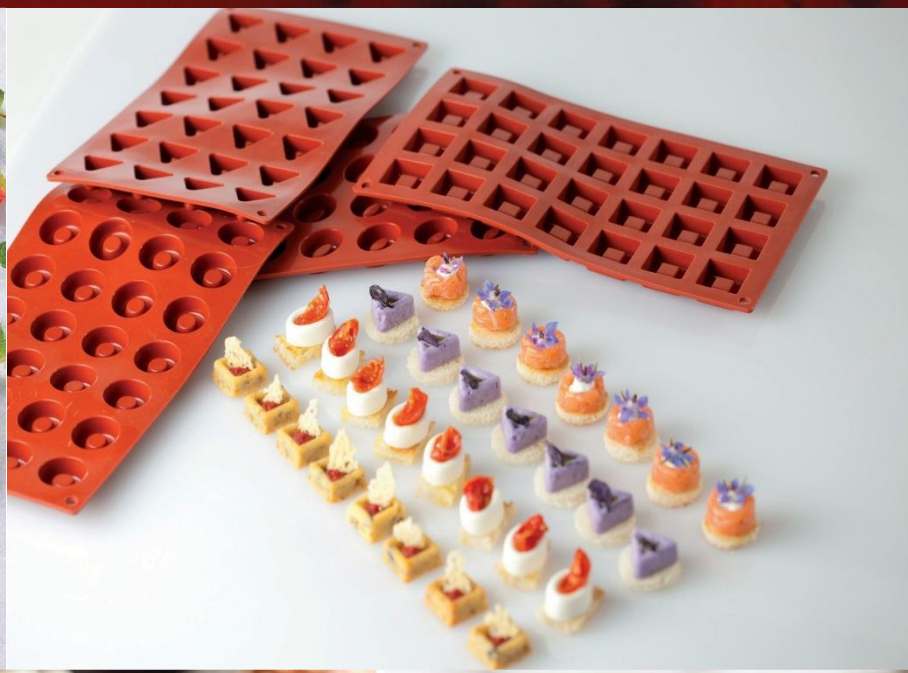
100% platinum silicone cake molds cm 17,5x30 - GN 1/3.

Suitable for freezing and baking (resistance from -40°C up to +280°C). For a correct use, put the moulds on grills or perforated trays in order to improve the heat diffusion during baking.

High non-stick properties to let a perfect demoulding of the product.

Can be washed by hand or in dishwasher.

Manufactured in conformity with international regulations concerning food contact: D.M. no. 104 of 21/03/1973 (Italian law) - Arreté du 25/11/1992 (French law) - BGVV (German law) - FDA (USA law).



RAKPRO

PADERNO®

COOKWARE STONEWARE SERIES 41210

- The stoneware gives a rustic and informal tone but can also create an atmosphere with an antique flavor in the most modern en vironments
- Similar to porcelain it can be used in the oven and in the microwave
- Suitable for storing food in the freezer
- Avoid thermal shocks. Stoneware retains heat very well and distributes it evenly. Perfect for serving from the oven to the ta ble keeping food warm during meals. Moreover the water absorption is equal to 0% a feature that allows to keep the flavors of the food served unchanged
- Easy to clean, dishwasher safe.

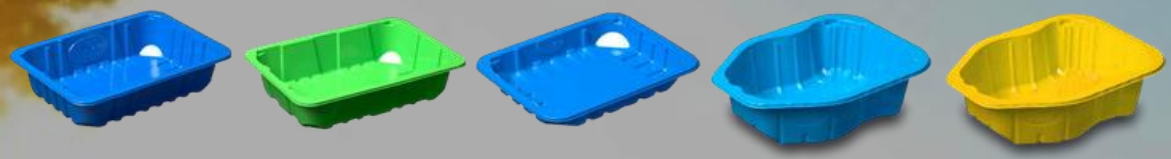
Freshness Sealed Quality Revealed

النضارة محكمة، الجودة مكشوفة

Plastic Poultry containers



In the products industry maintaining the freshness and quality of perishable products like meat is crucial PET Polyethylene Terephthalate trays have become a popular solution due to their numerous benefits These trays offer superior product protection by creating a barrier against oxygen moisture and contaminants which helps extend shelf life and maintain freshness Their transparency allows customers to easily assess the quality of the meat, enhancing its visual appeal PET trays are also known for their durability and strength providing robust protection during handling and transportation Additionally they offer versatile design options allowing for customization to meet specific packaging needs

في صناعة تغليف المواد الغذائية، يُعد الحفاظ على نضارة وجودة المنتجات القابلة للتلف مثل اللحوم أمرًا بالغ الأهمية. أصبحت عبوات البولي إيثيلين تيريفثاليت PET حلاً شائعًا نظرًا لفوائدها العديدة. توفر هذه العبوات حماية فائقة للمنتج من خلال إنشاء حاجز ضد الأكسجين والرطوبة والملوثات، مما يساعد على إطالة عمر الرف والحفاظ على النضارة. شفافيتها تتيح للعملاء تقييم جودة اللحوم بسهولة، مما يعزز جاذبيتها البصرية. تُعرف عبوات PET بمتانتها وقوتها، مما يوفر حماية أثناء التعامل والنقل بالإضافة إلى توفر خيارات تصميم متعددة مما يسمح بالتخصيص لتلبية احتياجا التغليف المحددة

PS Absorbent Trays

absorbent trays are the best solution for packaging fresh meat, poultry and fish. Its inner core is able to hold a large amount of fluid that drips from the meat. This way the product always appears clean on the shelf, and cleaning and its cost are no longer necessary.

تعتبر الصحون الماصة أفضل الحلول لتعبئة اللحوم الطازجة والدواجن والاسماك لبها الداخلي قادر على الاحتفاظ بكمية كبيرة من السوائل التي تقطر من اللحم بهذه الطريقة يظهر المنتج دائماً نظيفا في العرض ولم يعد التنظيف وتكلفته مسألة شاقة
